HONORING THE PAST, CELEBRATING THE PRESENT, PREPARING FOR THE FUTURE

2010 Annual Report

STEELE MEMORIAL MEDICAL CENTER

Celebrating 60 Years of Providing Compassionate Healthcare to our community

1950-2010
Greetings from Steele Memorial Medical Center!

Today’s healthcare environment is changing and the future of health care is being shaped by many forces. In order to survive in this ever changing environment, today’s health care providers must be proactive in their planning and preparation for the future.

Woodrow Wilson once said, “No man that does not see visions will ever realize any high hope or undertake any high enterprise.” Over the past many months we have been diligently working through a comprehensive visioning and strategic planning process. The community input received has been integral to our vision and objective development. I would like to personally thank all of you who contributed. I am excited to begin sharing with our communities the new vision of the Steele Memorial Medical Center, a vision that will guide us well into the 21st century and position us to favorably adapt to an ever changing healthcare environment:

Steele Memorial Medical Center is driven by a vision of service and organizational excellence. In achieving this vision, SMMC will be the first choice for healthcare services for the residents and visitors of the Salmon/Lemhi Valleys and surrounding areas.

How can such a vision be achieved you might ask? We have identified several key initiatives centered around People, Service, Quality, Finance and Growth. The successful achievement of these initiatives through specific actions will direct us towards fulfilling our new vision.

The constant in the future of healthcare is change. Steele Memorial Medical Center is committed to proactively planning for and adapting to our changing environment in order to help make our communities a better place to live, work, raise families and enjoy life.

People grow through experience if they meet life honestly and courageously. This is how character is built - Eleanor Roosevelt

February 27, 2010 marked the 60 year anniversary of Steele Memorial Hospital. Relying upon funds generously provided by the residents of Lemhi County, donations and a large contribution made by Eleanor and Emmett Reese in the memory of Eleanor’s father, Charles Steele, construction on the facility for Steele Memorial Hospital began in 1949. After completion of construction in 1950, Steele Memorial Hospital, opened its doors for patients on Monday, February 27, 1950 and immediately began fulfilling the needs of the local residents of Salmon, Idaho.

Over 52 years later in November 2002, the citizens of Lemhi County passed a General Obligation Bond to help support construction of a new, replacement hospital facility. This bond combined with a $3 million grant pledge to the Steele Memorial Foundation from the Steele-Reese Foundation made construction of a new hospital a reality. Construction of the new hospital began in May 2003. The new facility, officially renamed Steele Memorial Medical Center, held its grand opening on October 22, 2004.

In March 2003, the Steele Memorial Medical Center Board of Directors identified a need for management services and contracted with Quorum Health Resources (QHR). Relying upon QHR's vast resources, for health care leadership, industry expertise, consulting services and training opportunities for board members, department managers and staff, Steele Memorial Medical Center has grown and expanded to provide and offer various health care services to the rural area.

Today, Steele Memorial Medical Center (SMMC) is a Medicare Certified, not-for-profit, 18-bed Critical Access Hospital and associated Rural Health Clinic providing comprehensive health care for residents and visitors of the Salmon and Lemhi River valleys and surrounding areas. Steele Memorial Medical Center's highly skilled providers and employees are committed to delivering compassionate health care to each and every patient. Our services include: outpatient and inpatient care, laboratory services, medical imaging, a comprehensive therapy department, and surgical services—including general, orthopedic, gynecological and endoscopy procedures. Our outpatient specialty clinic offers: cardiology, dermatology, hematology/oncology, ophthalmology, podiatry, plastic surgery, psychiatry as well as a vascular disease clinic.
The Board of Directors are a group of local residents with diverse backgrounds, entrusted with the governance of Steele Memorial Medical Center by the Lemhi County Commissioners.

In January of 2010, Vic Phillips was elected as Chairman; Ryan Allen as Vice-Chairman; and Jason Smith as Secretary/Treasurer. Under their leadership, the Board collectively accomplished several tasks including:

- Appointment of Linda Astalos, COO/CNO, Infection Control Officer as Interim Chief Executive Officer from March 9 through August 1.
- Payment of $232,000 to fulfill Steele Memorial Medical Center's annual hospital bond obligation.
- Various cost-saving initiatives such as implementation of a new employee health plan through PacificSource Health Plans
- Appointment of Jeff Hill as the Chief Executive Officer
- Re-election of Ryan Allen and Dennis Lile, each for a 3-year term to the Board of Directors
- Acquisition of the Motel Deluxe Property
The purpose of the Steele Memorial Foundation, as recorded in its bylaws, states, “The Foundation, by working with and through Steele Memorial Medical Center, seeks to improve medical care and medical services, thereby benefiting communities, residents, and visitors of Lemhi and Custer Counties.”

The 2010-2011 Annual Giving Campaign began in November 2010 with the Foundation’s annual letter drive. With a goal of $40,000, the Foundation chose to designate funds received toward purchasing a Portable Ultrasound machine. The current ultrasound machine requires operation by a specially trained technician called an ultrasonographer. The technician comes to SMMC only once or twice per week to do the testing. This new, portable ultrasound unit can be used by any trained medical provider which will allow SMMC to do ultrasound testing at anytime. In addition, because it is portable, it can be brought to the patient’s bedside for the testing, if the patient is too sick or unstable to go to the radiology department.

The previous Annual Giving Campaigns were a great success and the Foundation hopes, with the community’s continued support, to meet and exceed the accomplishments of preceding years:

- 2009-2010—$41,958.84, Rehabilitation Equipment
- 2008-2009—$36,466.14, Wireless Biotelemetry System
- 2007-2008—$86,876.00, Computerized Radiography Equipment
- 2006-2007—$32,290.56, Fetal Monitoring Unit for the Obstetrical Program

The money gained from each of our campaigns supplies Steele Memorial Medical Center with modern tools to continue providing quality, compassionate healthcare.

The Donor Wall, in the hospital lobby, has long been a public place to acknowledge the many Friends, Sponsors, Patrons and Benefactors of the Steele Memorial Foundation who have given $500 or more. It is also an area to view the many donations made in memory of friends and loved ones. While the Steele Memorial Foundation Donor Wall is significant, we wish to recognize and honor all of the many individuals who have donated, whether it be $5 or $5000, and to all of our donors we say, “Thank You!”

STEEL MEMORIAL MEDICAL CENTER MEETS BOND OBLIGATION

Linda Astalos, Interim CEO, met with the County Commissioners on Monday June 28th to present a check in the amount of $232,000 fulfilling Steele Memorial Medical Center's annual hospital bond obligation.

The 2003 Lemhi County Hospital Bond was used to construct the new, now-existing, Steele Memorial Medical Center. In January of 2009, the Steele Memorial Medical Center Board of Directors Finance Committee, together with an ad hoc committee consisting of board members, administration, and community members, developed and approved a policy to assure that a standardized process is used to determine the amount Steele Memorial Medical Center contributes to Lemhi County each year for payments of the bond. The policy is based on audited financial statements, and is in place to guarantee the organization remains financially viable while contributing to the bond.

Ms. Astalos stated, “On behalf of the Steele Memorial Board of Directors and Administration, we are so pleased to meet our bond obligation this year. It is so important that we recognize our community and thank them for their support of Steele Memorial Medical Center.”

STEEL MEMORIAL MEDICAL CENTER BOARD OF DIRECTORS APPOINTS A CEO

The Steele Memorial Medical Center Board of Directors announced that Jeff Hill has accepted the CEO position at Steele Memorial Medical Center and will begin on Monday, August 2. Jeff received his Bachelor of Science degree in Medical Technology from Wichita State University and his Master of Business Administration in health administration from the University of Colorado.

Jeff and his wife Barbara, together with their three children (Logan, Regan and Gracyn), relocated to Salmon from Galena, Illinois where he was the President and Chief Executive Officer of the Midwest Medical Center and the Galena-Stauss Senior Care Community. Through his vision and guidance, Jeff worked to establish Midwest Medical Center as a model Critical Access Hospital ensuring that high-end medical treatment would be sustained in a county recognized as medically underserved.

With over 20 years of health care experience, Jeff is a member of the American College of Healthcare Executives, the National Rural Health Association, and the Rural Health Issues Group (an advisory group of rural hospital executives to the Federal Office of Rural Health Policy). He previously served on the Illinois Hospital Association's Advocacy Council & Certificate of Need Blue Ribbon Panel, and is the Past President of the Illinois Hospital Association, Region 1A. Jeff has a longstanding history of being an active member of both community and business associations.

When asked about his appointment as CEO of Steele Memorial Medical Center, Jeff stated, “I look forward to working closely with our Steele Memorial Board of Directors, providers, employees, and community members to build upon the firm foundation of SMMC and to ensure our mission of providing Compassionate Healthcare.”

STEEL MEMORIAL MEDICAL CENTER BOARD FINALIZES THE PURCHASE OF THE HOTEL DELUXE

Steele Memorial Medical Center entered into a purchase agreement on August 18, 2009 with Steve and Donay Freestone, then owners of the Motel Deluxe and surrounding property. Vic Phillips, Board Chairman commented that, “When the opportunity to acquire property adjacent to the Medical Center presented itself, the Board felt the prospect deserved careful consideration and due diligence.” After commissioning a professional appraisal, SMMC negotiated a purchase price with the Freestone's based upon the completed appraisal received. SMMC finalized the purchase and acquired ownership of the property on Wednesday, January 5, 2011.

Regarding future plans for the property, Jeff Hill, CEO stated that, “The property acquisition presents a wonderful opportunity for potential future development and expansion to meet the growing healthcare needs of our community.”
Awards & Achievements

For 60 years Steele Memorial Medical Center has been nestled in the Salmon River Valley quietly caring for our community. Certainly, we have had our moments in the spotlight over the years, but this past year SMMC has earned three impressive awards.

QUALITY RESPIRATORY CARE RECOGNITION

Steele Memorial Medical Center is one of about 700 hospitals or approximately 15% of hospitals in the United States that has applied for and received the Quality Respiratory Care Recognition (QRCR) award.

The QRCR program was started by the American Association for Respiratory Care in 2003 to help consumers identify those facilities using qualified respiratory therapists to provide respiratory care. Hospitals earning the QRCR designation ensure patient safety by agreeing to adhere to a strict set of criteria governing their respiratory care services. Hospitals that meet the QRCR requirements provide a level of respiratory care consistent with national standards and guidelines, and should be commended for their commitment to quality care.

QUALITY LABORATORY SERVICES

Steele Memorial Medical Center Laboratory has met and exceeded criteria for Laboratory Accreditation by COLA, a national healthcare accreditation organization. Accreditation is achieved by laboratories that apply rigid standards of quality in day-to-day operations, demonstrate continued accuracy in the performance of proficiency testing, and pass a rigorous on-site laboratory survey. Steele Memorial Medical Center Laboratory has earned COLA accreditation as a result of a long-term commitment to provide quality service to its patients.

COLA is a nonprofit, physician-directed organization promoting quality and excellence in medicine and patient care through programs of voluntary education, achievement, and accreditation.

BLUE CROSS OF IDAHO HOSPITAL QUALITY AWARD

“I enthusiastically congratulate the four hospitals earning our 2009 Hospital Quality Awards and commend them for their commitment to excellence,” said Ray Flachbart, President and CEO of Blue Cross of Idaho. “Our award winners and the other 29 hospitals participating in the program have a significant impact throughout Idaho – their quality improvement and patient safety efforts save lives and reduce overall healthcare costs.” Steele Memorial Medical Center received the Award of Achievement for rural hospitals.

The Hospital Quality Awards recognizes the top performing hospitals in the company’s Hospital Quality Incentive Program. The incentive program and quality awards are part of Blue Cross of Idaho’s ongoing efforts to promote a healthier Idaho and improve quality in healthcare.

Linda Astalos, Interim CEO stated, “Receiving this quality award is indicative of the work demonstrated by all of the employees of Steele Memorial Medical Center. It takes everyone’s hard work and dedication to achieve the quality, excellence and clinical outcomes that we do.”

Achievement seems to be connected with action. Successful men and women keep moving. They make mistakes, but they don’t quit - Conrad Hilton
I want to commend Gloria and Sue in their skilled stress test administration last Friday, February 19, 2010. I was comforted by their competence, their personal, friendly care, and their positive affirmation of how well I did.

I went into that test cold, nervous, and apprehensive about the condition of my heart. But Sue and Gloria put me at ease and made it an educational experience. Both women are thorough in their explanation of what to expect and what they needed me to do and why. They make an excellent team and are an asset to the hospital.

Sincerely,
Carole Harmon

Dear Editor,

Last week, my parents were visiting here from out of state for Salmon River Days. While they were here, my mother experienced some health problems that resulted in her needing the services of both Steele Memorial Clinic and Hospital.

As initial tests indicated the need for more procedures there was a flurry of phone calls from my siblings who were very concerned about mom getting her health care here in little tiny Salmon instead of at one of their city’s bigger better facilities.

I just want to say that the level of care my mom received here and all of the health professionals we dealt with were EXCELLENT. We started with the receptionist at the clinic who was efficient, professional and friendly.

The nurse who took blood pressure, etc. was so kind and treated my mom (a retired RN) with such respect. Following the nurse, Suzanne Nebeker came in and listened attentively to mom’s history and symptoms and thoroughly explained the testing she was ordering.

Mom was very impressed with Suzanne’s kind, respectful bedside manner. We ended up at the hospital where we had positive interactions with Faye at the desk, Jason in radiology and several other persons in the lab. I wish I knew the name of every person we came into contact with, because EVERYONE was so professional and competent.

At Rigby’s Pharmacy the pharmacist took extra time to carefully answer questions my dad and I had about the medication.

In conclusion, we felt that every health care professional we came into contact with was exceptional in terms of professionalism, knowledge and skill level. Most of all the degree of PERSONAL care that my mom received was extraordinary. We are all fortunate to have such good health care here in Salmon.

Deb Westfall
My wife Mary Harbour was in the Hospital May 13 to May 16. We would like to compliment Nurse Carol Cunningham. Carol was very nice to Mary and took very good care of her. Carol Cunningham is a very skilled, kind, caring, professional nurse.

Sincerely,

K. Grant Harbour

Wendy and I would like to give a special thanks to the following people and everyone who helped me during my recent illness, surgery, and recovery.

Nurse Practitioner Ruth Campbell and the staff at the medical clinic. Dr. Adam Deutchman, CRNA Dan McClenahan, the nurse and staff at Steele Memorial Medical Hospital. We are very fortunate to have such professional, kind, and caring medical personnel and staff in Lemhi County.

With the highest respect, thanks, and gratitude,

Jack and Wendy Neal

From May 1 through May 8 I was a patient in room 203. Having travelled extensively throughout this country and the world, I can tell you without equivocation that the caliber and quality of care including the personal attention I received exceeded the finest 5-star hotels I've visited!

From the Emergency Room to the OR to the nurses station to the kitchen to the front office the level of compassion, professionalism and senses of humor were exceptional.

I really wanted to recite the names of all your great staff who attended me, but in my state of “morphine, manicual euphoria” I only gathered a fraction of those caring professionals I want to thank and applaud:

Charles Porter, LPN (my new best friend!); Becky Infanger, RN and Sherry (my competent and gracious case managers); Kathryn Catlett, RN; Laurie Villani, cook; Virginia Knox; RN, Leslie Austin, LPN; Cari Whitton, RN; Kayla Miller, LNA; Tammy Peterson, RN; Mike Johnston, cook; Carol, Virginia, and Connie; Tina Halton, cook; and Barbara Nichols, kitchen manager; and Debbie W, ward clerk.

Believe me, any one with whom I came in contact were wonderful - even Dr. Yanoff, my surgeon; Dr. Zavotsky and Ruth Campbell, NP - my primary care whiz.

I've always fought for and supported the hospital and feel so blessed to have you in our community. I'm absolutely convinced that my rapid healing is a direct result of all of the outstanding care that I received from the physicians, medical, technical, administrative and support staff. You are indeed, an A+ team - and I'm an exceptionally hard grader. My loving thanks and kudos to all of you.

Mary Ann Oberhaus

The Hip-Chick from #203

Dr. Hayward and Staff -

Thank you again for the excellent and compassionate care I received from you on July 9, 2010 - all while passing through Salmon on our way to Minnesota. I'm just fine and thank all of you so much.

Sincerely,

Marjorie Piering

The Rural Health Clinic, Steele Memorial Clinic, provides many valuable services to the community. The Clinic's staff consists of one OB/GYN specialist, and two Family Practice/OB physicians, who are partnered with two Nurse Practitioners. A Board Certified General Surgeon and Board Certified Orthopedic Surgeon also provide screening, consultation and operative treatments.

Steele Memorial Clinic provides the following direct services at the clinical site, making use of the services of physicians and physician extenders:

- Office Visits, Home Visits, Nursing Home Visits, Incarcerated Visits,
- Patient Counseling, Physical Examinations, Blood Pressure Checks,
- Gynecological Examinations (Includes: pelvic, pap smear, breast, and rectal examinations), Hospital Visit (Initial), Hospital Visit (Subsequent), Obstetrical Care (Complete) Uncomplicated Including Antepartum Care, Delivery and Post-Partum, OB Procedures, Referrals to Specialists, Audiometry/Audiogram, Arthrocentesis, Ear Examination/Ear Wash, Cauterization, Excision Large Skin Lesion, Excision Small Skin Lesion, Excision of Ingrown Toenail, Foreign Body Removal, Foreign Body Removal (Eye), Fracture Care and Follow-Up, Incision and Drainage (Simple and Uncomplicated), Laceration (Small and Large), T.B Skin Test, Tonometry (Screen), Visual Acuity Test, IUD Insertion and Removal, Colposcopy and Biopsy, Peak Flow Meter, Cryotherapy of Lesions, Toenail Trimming, Trigger Point Injections, Foot Exam (Diabetes).

Steele Memorial Clinic participates in the Hospital Performance Improvement program to gather data to continuously improve processes. The nurses and ancillary staff participate to set goals to improve the patient experience and satisfaction.

Steele Memorial Clinic provided 17,869 patient visits during the 2010 year to the residents of Lemhi and Custer County.

Becky Infanger
**ANESTHESIA**

The Anesthesia Department provides comprehensive anesthesia services, including general, spinal, major regional, moderate and deep sedation and pain management. The department is staffed with three certified nurse anesthetists. Anesthesia services are available for all emergency and obstetric cases.

**CARDIOPULMONARY**

The Cardiopulmonary Department provides cardiac diagnostic and respiratory therapy services. The Cardiopulmonary Department provides education for staff on the use of ventilators, BiPAP, CPAP, and Blood Gas Sample Collection, and is active in ACLS, PALS, and NRP education. The Cardiopulmonary Department was busy over the past year enhancing services. Some of the enhancements included: increasing continuity of care, therapist attendance at deliveries both day and evening shifts, updating evidence based procedures, increasing primary care provider participation for rehab patients, increasing monitoring technology for unstable patients, and introduction of treatment modalities for improved patient outcomes. The Cardiopulmonary Department continues a relationship with Premier Sleep Professionals, allowing high quality sleep studies to be provided locally. The Cardiopulmonary Department continues to explore services that will benefit the community.

Cardiopulmonary Rehabilitation offers both Cardiac and Pulmonary Rehabilitation to our patients. These patients attend either Cardiac or Pulmonary rehabilitation for one hour two to three times each week and are monitored and guided through endurance, strengthening, and education programs. Patients of both programs meet with their care providers monthly to insure that each patient's treatment plan is up to date and progress continues.

Steele Memorial Medical Center collaborates with visiting cardiology specialists to monitor patients through a physician directed, individually-tailored Cardiac Rehabilitation program.

**DIETARY**

Nutritional Services is responsible for the highest quality food services possible to all patients (pediatric through the geriatric population), personnel and visitors. Cost effective, nutritious, high quality meals are prepared and delivered daily to patient care and the public dining area. Physician meals and catered functions are also provided. Dietary Cooks and Dietary Aides interview patients so their nutritional likes, dislikes and allergies are reflected in the preparation of their meals. All nutritional care is planned and administered by the Food Services Dietary Manager with meals evaluated and modified by April Bruns, Registered Dietitian according to the patient’s individual dietary needs.

*All labor that uplifts humanity has dignity and importance should be undertaken with painstaking excellence - Martin Luther King Jr.*
EMERGENCY DEPARTMENT

The Steele Memorial Medical Center Emergency Department (SMMC ED) is a Level 3 emergency treatment facility, open 24 hours per day, 7 days per week. Our ED is fully staffed at all times with dedicated, licensed Emergency Room Physicians and nursing personnel. ED nursing staff maintains certification in Basic Life Support (BLS), Advanced Cardiac Life Support (ACLS), Pediatric Advanced Life Support (PALS), and Neonatal Resuscitation (NRP). The ED Emergency Services Technicians (EST’s) maintain certification in BLS and have also received additional in-service training on telemetry monitoring and performing EKG’s. All ED staff attended Team STEPPS training during 2010, a program focused on identifying and learning team strategies and tools that are used to enhance performance and patient safety.

In April of 2010, the ED went live with a new electronic medical record (EMR) called EPOWERdoc. We are now in the process of developing the bridge between the ED record and the Clinic record to enhance the flow of patient health information.

The ED continues to strive to improve care of trauma patients. A Trauma Team was organized, education provided, and policies and procedures for Trauma Team activation developed. The ED staff also received training on the Level I Rapid Infuser used for rapid fluid resuscitation during a trauma. In addition, the Human Simulation Manikin was brought in from the Idaho State University College of Technology for simulation trauma training.

SMMC participates in the LifeCenter Northwest and the Idaho Lions Eye Bank donor services program, receiving continuing education for staff and local morticians from LifeCenter Northwest. In-service education provided information on organ donation and procurement with a focus on our rural location to ensure compliance with State and Federal laws for organ donation.

Our ED participates in proctoring and training for nursing students and EMS volunteers. In addition, a representative from the ED nursing staff is present at and participates in the quarterly Lemhi County Emergency Services Council (LEPC) meetings.

Through donations from the Steele Memorial Medical Center Foundation, the ED has available for use a teleradiology PACS System. In addition, the Foundation purchased a Datascope Patient
**ENVIRONMENTAL**

The objective of the Engineering Department is to maintain a safe environment for patients, visitors and staff. This is accomplished by performing scheduled maintenance on the buildings and equipment, insuring reliability and mitigating costly repairs. Engineering is also responsible for the upkeep of the grounds and snow removal.

Some accomplishments for 2010:

- Purchase and installation of water softener to extend the life of equipment such as autoclaves, boilers, washers, dishwasher, hot water holding tanks.
- Upgrade of clinic HVAC controls. This upgrade is designed to make the clinic more comfortable and cut power consumption by 10%
- Installation of the clinic emergency generator. The generator was purchased through a grant from the Department of Homeland Security / FEMA.

**ENGINEERING**

- Upgrade of clinic HVAC controls. This upgrade is designed to make the clinic more comfortable and cut power consumption by 10%
- Installation of the clinic emergency generator. The generator was purchased through a grant from the Department of Homeland Security / FEMA.
INFORMATION TECHNOLOGY

The Information Services Department was established to provide all other departments and staff of Steele Memorial Medical Center with the information technology tools necessary to optimize their performance which, in turn, allows the organization to provide the highest possible quality of care to our patients. The IT Department strives to provide a progressive, yet stable, information technology environment. Acquisition and implementation of hardware and software, training, troubleshooting, end-user support, and preservation of data integrity are all functions of this department.

Steele Memorial Medical Center received the prestigious Most Wired Hospital Award for 2009. The Most Wired Survey is conducted annually by Hospitals & Health Networks magazine, the journal of the American Hospital Association (AHA), which uses the results to name the 100 Most Wired hospitals and health systems. It focuses on how the nation’s hospitals use information technologies for quality, customer service, public health and safety, business processes and workforce issues.

“As the health reform debate continues, it’s clear that IT will play an even more important role in the health system of tomorrow,” says Rich Umbdenstock, president and CEO of the AHA. “Most Wired hospitals help illustrate IT in action—improving efficiency, quality and safety of care while helping to control costs.”

LABORATORY SERVICES

The Clinical Laboratory Department is a comprehensive service providing testing and blood bank services for all patients utilizing the facility. The Clinical Laboratory provides services 24 hours per day, seven (7) days per week to both the inpatient and outpatient population. Services include: Microbiology, Hematology, Chemistry, Urinalysis, Serology and Blood Bank. The department has aggressively sustained the ability to provide state-of-the-art testing by adding new equipment on an ongoing basis. Relationships with outside reference laboratories allow for completion of any laboratory test in a timely manner via computerized interface.

MEDICAL/SURGICAL INPATIENT UNIT

The Medical/Surgical Inpatient Unit is open 24 hours a day, seven days a week. The unit consists of 7 semi-private rooms and 2 private rooms for a total of 16 patient beds. All patient rooms are wired to have the capability to continuously monitor our patient’s cardiac status via remote Cardiac Telemetry Monitoring. The Steele Memorial Foundation donated a state of the art Telemetry System to the hospital in 2009. With this system, patients can be monitored remotely throughout the hospital. Documentation on the Medical/Surgical Unit is done electronically on Computers on
Med/Surg Continued

Wheels (COWs) which allows for real time documentation at the patient bedside. In addition, patients on the Medical /Surgical Unit are provided wireless internet access, if so desired.

The Medical/Surgical Inpatient Unit provides a wide range of patient care services to a patient population which includes infants, children, adults and geriatric patients. The Unit specializes in the care of patients with general medicine, general surgical, orthopedic surgical and orthopedic conditions. Our care team provides excellent care to patients who are acutely ill and to patients requiring progressive multi-disciplinary restorative care via the Swingbed Program. The Swingbed Program was designed for those patients unable to care for themselves and requiring additional therapy and/or care prior to discharge. Patients admitted to the Swingbed Program remain on the Medical/Surgical Inpatient Unit to receive the needed additional care and therapy. The Medical/Surgical inpatient unit is fully staffed with a Nurse Manager, Case Manager, Registered Nurses, Licensed Practical Nurses, Nursing Technicians, and a Ward Clerk.

Performance improvement on the Medical/Surgical Unit is continuous and all nursing staff is involved in setting goals for the unit and collecting data to improve processes. Nursing staff on the Medical/Surgical Unit are a high performance team who has a wide variety of training and experience. Because we treat everyone from infants to elderly patients, we encourage our nurses to be lifelong learners along with staying current in new medical procedures and technology. The Medical/Surgical nursing staff is trained in Basic Life Support (BLS), Advanced Cardiac Life Support (ACLS), Pediatric Life Support (PALS), and Neonatal Resuscitation (NRP). The nursing staff on “Med-Surg” work within a multidisciplinary healthcare team that includes Physicians, Nurse Practitioners, Nurse Anesthetists, Lab, Radiology, a Dietitian, Pharmacists, Physical, Occupational and Speech Therapists, and Respiratory Therapists in developing a plan for care to fit each individual patient’s needs.

Patients are admitted to the Medical/Surgical Inpatient Unit from the Emergency Department or the Steele Memorial Clinic to the care of their primary care physician, specialist, or Nurse Practitioner (NP). Patients may also be transferred to the Medical/Surgical Inpatient Unit from facilities outside our area. In 2010, the Medical/Surgical Inpatient Unit had 402 admissions with a total of 1,246 in-patient days having an average in-patient length of stay of 2.7 days. Our top admitting diagnosis included pneumonia, obstructive bronchitis, dehydration, urinary tract infection, altered mental status, malignant neoplasms, congestive heart failure, obstructive incisional hernia repair, and regional enteritis.

**OBSTETRICS DEPARTMENT - NEWBORN NURSERY**

The Obstetrics Department at Steele Memorial Medical Center has two state of the art Birthing Suites. Our birthing suites are equipped with remote fetal/maternal heart monitoring equipment that allows the laboring mom to walk in the hall and continue to be monitored for safety by our nursing staff. This system was donated by the Steele Memorial Foundation in 2006. Our birthing suites are equipped with a Jacuzzi tub to allow mom to relax in a warm bath during early labor, flat screen televisions and wireless...
OB Continued

computer access, in addition to the equipment needed during and after the delivery. The Obstetrics Unit welcomed 56 newborns for 2010. After the delivery, the baby is taken to our beautiful, well equipped newborn nursery where the baby is assessed, weighed, measured and prepared to take back to mom.

Nursing staff who work in the Obstetrical Department are highly trained and are certified in Neonatal Resuscitation. Our staff focuses on ensuring that the birthing experience is safe, comfortable and memorable for our patients and their families. Many of our patients who deliver at Steele Memorial Medical Center were delivered here themselves by staff that is still working and providing excellent care. Our Obstetrical Unit is so fortunate to be able to provide all of our patients who deliver at Steele Memorial Medical Center with homemade baby blankets, caps, and other items created and donated to us by the Steele Memorial Auxiliary. This is a “special loving touch” that only happens in a small facility like ours.

Some of the services provided by the OB Department include:

- Prenatal tours
- Antepartum Stress Testing & Monitoring
- Continuous Fetal Heart Monitoring
- Pain Management & Pain Management Education by Anesthesia
- Useful Information to Patients in Regard To:
  - What to Bring to the Hospital and What to Expect During Labor
  - Post Partum Education on Self Care after Delivery
  - Newborn tips After Arrival Home
  - Safety after Baby Comes Home
- OB Delivery
- Rooming In
- Lactation support
- Web Based Baby Photo Access
- Family Support
- Newborn Hearing Screen
- Circumcision

Obstetrical Services at Steele Memorial Medical Center are provided by Dr. Richard Natelson, Dr. Diane Zavotsky, and Dr. Samuel Gardner, all are highly trained, skilled providers. Dr. Natelson provides surgical services for Obstetrical and Gynecological Services.

OUTPATIENT SPECIALTY CLINIC

The Outpatient Specialty Clinic is an ever-expanding group of specialists, many of whom travel to Salmon to care for our patients. Specialty medical services offered include: Dermatology, Cardiology, Vascular, Podiatry, Psychiatry, Optometry, and Oncology.

In 2010, Plastic Surgery was added to this group of specialty medical services. Both surgical and non-surgical enhancement procedures are available in addition to consideration of complex surgical repairs.

Dermatology services increased in 2010. Mole removals, melanoma evaluations, and minor surgical removal of non-cancerous lesions are a few of the services offered. Dr.
Outpatient Continued

Carrington also provided free cancer screenings at the annual Health Fair.

Oncology services that include consultation and chemotherapy treatment are available. SMMC has Registered Nurses certified in Chemotherapy Administration. This service allows our patients to receive their chemotherapy at Steele Memorial Medical Center and avoid long distance travel.

Cardiologists travel from Missoula twice per month to see new patients and schedule follow-up visits for established patients. They perform stress echo cardiograms and cardioversions. This service allows our patients to remain in the community for their cardiology care. The Cardiologists also consult on Emergency Department patients and Medical/Surgical inpatients during their time in Salmon.

Cardiac Sonography testing is available Monday through Friday. Sue Eder passed her national certification for Cardiac Sonography in 2010.

Podiatry services include consults, orthotics, and surgical procedures.

Telepsychiatry became available in our Outpatient Specialty Clinic in August of 2008. Telepsychiatry is a service offered to our patients via the Web, which again allows our patients to remain in the community for their mental health care. A physician referral is not necessary. This service has received very positive feedback and support from the community.

Steele Memorial Medical Center continues to actively recruit physicians in other specialty areas.

PHARMACY

Steele Memorial Medical Center Pharmacy is staffed by 2 full time registered Pharmacists and one certified full time technician. The Pharmacy is manned seven days a week with on call services provided 24/7 when the Pharmacists are not in house.

In attempt to improve patient safety, the pharmacy department was integral in the setup and implementation of new smart pump technology. The new MOOG PainSmart IOD patient controlled analgesia pumps are now used for all patients with intravenous analgesia. The “smart pumps” are preprogrammed with standard pain protocols to assist the nursing staff in the setup of these high risk drugs. With these new safeguards in place, the high risk error prone drugs of intravenous analgesia are safely administered to both med/surg and obstetric patients at a decreased risk.

In addition to the previous policies for H2 antagonists, Proton Pump Inhibitors, Statins, Insulins and Carvedilol, in 2010 the hospital pharmacy created new cost saving initiatives to help decrease drug cost. Formulary substitution protocols for angiotension receptor blockers (ARBS), alpha blockers, and glitazones have all been implemented in 2010.

In effort to focus on National Patient Safety Goal 3E, the pharmacy adapted policies and procedures for both inpatient and outpatient anticoagulation. In June of 2010 in a collaborative practice
Pharmacy Continued

agreement with the local physicians, Steele Memorial Medical Center established an outpatient anticoagulation clinic managed by the pharmacists. From the start of the clinic to the end of the year 2010, the pharmacists have seen over 120 patients in 1090 patient visits. With over 18,187 total patient days of all the patients attending the anticoagulation clinic, the pharmacists are currently maintaining 73% of the patients in therapeutic range.

The pharmacy staff continues to work with the medical staff to maintain a high standard of care with a strong focus on patient safety.

RADIOLOGY/DIAGNOSTIC IMAGING

The Diagnostic Imaging Services/Radiology Department is an extensive service providing technologically sophisticated clinical application of imaging technology 24 hours per day, seven (7) days per week. Services are provided to the inpatient and outpatient population of all ages, both within the Imaging Services/Radiology Department and at the patient bedside. Outpatient results are sent to the ordering physician’s office. Recent equipment additions include a Digital Ultrasound Unit – in which we provide all ultrasound services including a Screening Carotid Ultrasound.

The department consists of Diagnostic Radiology, 64-slice CT, MRI, Mammography and Ultrasound services.

REHABILITATION SERVICES DEPARTMENT:

PHYSICAL, OCCUPATIONAL, AND SPEECH THERAPIES

The Rehabilitation Services Department at Steele Memorial Medical Center delivers comprehensive services to individuals with physical and/or cognitive dysfunction secondary to disability, disease or injury in accordance with professional standards of practice, departmental policies and procedures, and organizational standards. Services include comprehensive assessments, development of treatment plans, delivery and documentation of care, consultation, re-evaluation, discharge planning, and patient/family education. Evaluation and treatment is offered to both in-patients and out-patients of all ages.

Rehabilitation Services grew by two therapists in 2010! SMMC is very pleased to have these two excellent additions to the therapy department. Our new employees are Jill Polson PT, DPT who graduated from the Physical Therapy doctorate program at Idaho State
Rehabilitation Continued

University in May of 2010 and started working at SMMC in June of 2010, and Anna Greenwood SLP who graduated from Idaho State University in May of 2009 with a Masters in Speech Language Pathology. Anna also started here at SMMC in June of 2010.

With the addition of Jill Polson, Rehabilitation Services has returned to offering sports medicine at the high school. During the 2010 fall semester, Jill was able to treat students athletes with acute, chronic and overuse injuries, performed 19 concussion screenings and followed 6 concussed athletes as they returned to play. Also with having an additional PT, SMMC was able to offer a contract to Discovery Care Centre that provides in-house physical therapy services for their residents.

In the latter half of 2009 up until June of 2010, we were not able to offer speech therapy services. With the addition of Annie Greenwood, SMMC is now able to offer speech therapy again including modified barium swallow testing.

Also in 2010, the rehabilitation department purchased all the equipment that was earmarked with the foundation funds.

SURGICAL DEPARTMENT

Steele Memorial Medical Center Surgical Department believes in going the extra mile by offering the leading edge in quality care and equipment. The department is committed to continuously improving standards of patient safety and adopting Proven Best Practices. Whether admitted as an inpatient or the visit begins in Day Surgery, all receive sophisticated care from the physicians and staff of the Steele Memorial Medical Center Surgical Department. The large operating rooms and state-of-the-art equipment allow the surgeons and staff the environment to focus on the patient and provide compassionate healthcare.

Thanks to the latest minimally invasive laparoscopic surgical techniques, SMMC’s specialists can perform entire surgeries through tiny incisions while inflicting less pain; causing minimal scarring and allowing for a speedy recovery.

The Surgical Department offers surgical procedures in the areas of General, Vascular, Orthopedic, Gynecological, Optical, Cardiac, Plastic, Radiological and Podiatric Surgery. Steele Memorial Medical Center Surgical Department is dedicated to delivering the highest levels of compassionate and quality health care with the goal of helping you, your family and your neighbors fulfill the need for better health and an improved quality of life.

Success is not the key to happiness. Happiness is the key to success. If you love what you are doing, you will be successful - Albert Schweitzer

What lies behind us and what lies ahead of us are tiny matters compared to what lives within us - Ralph Waldo Emerson
Steele Memorial Medical Center is committed to making a difference in the lives of community members everyday. Throughout the year, a variety of community outreach programs, sponsored by Steele Memorial Medical Center, provide needed educational and health care services, making Steele Memorial Medical Center an integral part in the lives of members of our communities in Lemhi and Custer Counties. These ongoing programs and informal presentations on current health issues are offered, dedicated to keeping our community members healthy and well-informed, while highlighting the importance of prevention and wellness.

The following is a partial list of classes and programs that are offered to the community throughout the year. Most of these programs and events are offered at no charge to the community.

- Meet the Doctor's Series
- Expectant Parent Childbirth Preparation Program
- *Brake for Breakfast* – Breast Cancer Awareness Event
- Annual Community Health Screening Fair
- National Wear Red for Women’s Health
- Diabetic Support Group
- Sports Medicine Program
- Industrial Medicine Program
- Sports Physicals
- Lemhi County Fair Information Booth
- Health Care Professions and Careers
- Seasonal Flu Shot clinics
- Smoking Cessation classes
- Multiple Sclerosis Support Group
- Woman to Woman Health Symposium
I am of the opinion that my life belongs to the community, and as long as I live it is my privilege to do for it what I can - George Bernard Shaw

to promote breast cancer awareness
Our Valuable Volunteers

The Steele Memorial Auxiliary is a charitable organization providing service to Steele Memorial Medical Center and its patients to promote the health and welfare of our community. Providing a personal touch to patient care is where our Auxiliary members shine. They are available to answer questions and to direct patients to appropriate departments. The Auxiliary is comprised of 22 members who volunteer their valuable time to provide a myriad of services.

During the past year, the Auxiliary provided 3,260 hours of volunteer services. Activities for the year included: offering hand-crafted pillows for abdominal surgery patients, blankets, booties and hats for new babies, crafting and providing tray favors to all in-patients, as well as sorting incoming and outgoing mail. In addition, Auxiliary assistance has added to the success of SMMC community outreach programs such as the Annual Health Fair, Red Cross Sponsored Annual Blood Drive, Kid’s Christmas Party and Brake for Breakfast, the breast cancer awareness event.

In October 2010, our Auxiliary members had an exciting addition with an expansion and location change of the new Steele Memorial Gift Shop. The money received from sales was reinvested into the gift shop in order to provide a variety of items for patients, visitors and employees to purchase and enjoy. In addition, donations in the form of newborn gifts, handcrafted quilts, as well as a generous contribution to the Steele Memorial Foundation demonstrate another facet of our Auxiliary’s giving nature and valuable service. To make these and other contributions possible, various fundraisers, such as the homemade baked goods sale, quilt raffle and the 10th Annual Pink Tea, were held throughout the year.

2010 STEELE MEMORIAL AUXILIARY MEMBERS: Joan Schwarz, President; Roberta Fadness, Vice President; Susan Richards, Secretary; Carole Anderson, Treasurer; Sally Boyne, Norma Clore, Sandi Dolliver, Darlene Gauthier, Peg Hevel, Barbara Hill, Gloria Jakovac, Shirley Kempf, Norma McFarland, Pat McKinney, Alice Miller, Maxine Sager, Tory Segrue, Mona Sellegren, Carol Sheppeard, Kathy Tilford, Anna Vihlen and Honorary Member: Genie Quinn.

The world is hugged by the faithful arms of volunteers - Terri Guillemets
