Press Release

Steele Memorial Medical Center Ranks Highest in Studer Group's Leader Evaluation Manager

SMMC received the below announcement from Debbie Caskey with the Studer Group May 20th:

*"We have an internal Leader Evaluation Manager (LEM) SWAT Team that is reviewing all partners' LEM execution. They look at several criteria including compliance with data entry, 90 day plans and % utilization of goal templates. I'm excited to tell you that out of ALL *Studer Group partners, Steele ranked the highest!! Kelly Dickey one of our LEM Specialist has put together a case study of your LEM. We would like your permission to use this with other partners to show what "right" looks like."*

*Studer Group works with over 850 healthcare organizations throughout the US, Canada, Australia, and other countries internationally.

Committed to Delivering Compassionate Healthcare
